Your customers have a vision, you want to make it happen, and Fluid Management can give you the answer.

Fluid Management is a global leader in dispensing and mixing equipment used in the paint industry, as well as, specialized equipment for the food and beverage, chemical, health and beauty, and home improvement industries.

Located in the suburbs of Chicago, Illinois, Fluid Management is a United States owned and operated company with historical roots to the paint industry dating back to 1927. In 1996, IDEX Corporation purchased Fluid Management giving the organization the financial wherewithal and global footprint of a large organization while still maintaining its deep values and history.

As industry leaders, Fluid Management provides trend-setting creativity in the design, products, and services it offers. United with FMDirect, our nationwide service team, we provide after-sales support around the clock—when you need them. Being factory-direct employees, FMDirect technicians are experts on Fluid Management equipment and understand customer needs from start to finish.

The combination of leading edge technology, excellent service and support, and a company prepared for the future’s ever-changing business environment makes Fluid Management an ideal partner to assist in providing solutions to your business needs. Thank you for putting your trust in Fluid Management products and making us part of your customer’s vision.
Once you’ve installed your Accutinter 8000Elite Dispenser, what’s next? In this booklet, you’ll find more information to help you get the most from your new Fluid Management Accutinter 8000Elite.

How to Use this Guide

This Guide is organized into nine sections. Each section provides detailed information on Accutinter 8000Elite topics and provides a basic reference that can be used to help you with specific issues.

This Guide provides the information for installing your Accutinter 8000Elite, dispensing for the first time, and using ColorPro. This publication also includes basic troubleshooting suggestions, customer service help, information, daily and preventative maintenance procedures, and warranty information.

Your Accutinter 8000Elite dispenser includes detailed illustrated labels for how to clean the nozzles located inside the top canister cover of the machine. You can also find daily maintenance instructions in this guide on page 31. Make sure to follow these directions for the best performance of your machine.

ColorPro has basic information about using your Accutinter in the Help section of the software.

If you have internet access, the most current information for your Accutinter 8000Elite is available from the worldwide web at http://www.fluidman.com.

For Your Safety

Customer safety is important. Our products are designed to be safe and effective. However, dispensers are electrical equipment. The Accutinter line is safe, fast, and reliable—designed to bring many years of operation. There are precautions you can take to avoid damage to the equipment or bodily injury before operating. By carefully following the instructions in this document and the warning and maintenance labels on the machine, you can help protect yourself from hazards and create a safer work environment.

Equipment can become damaged due to misuse or neglect. Some product damage is serious enough that the product should not be used again until it has been inspected and, if necessary, repaired by a Fluid Management authorized service technician. As with any electronic device, pay close attention to the dispenser when it is turned on. On very rare occasions, you might notice an odor or see a puff of smoke or sparks vent from your machine, or hear sounds like popping, cracking or hissing. These conditions might merely mean that an internal electronic component has failed in a safe and controlled manner. However, it may indicate a potential safety issue. DO NOT take risks or attempt to diagnose the situation yourself. Contact Fluid Management at 1.800.462.2466 for assistance.

NOTE: This equipment is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the equipment by a person responsible for their safety. Children should be supervised to ensure that they do not play with the equipment.
Important Safety Information

Information and Instruction Labels
You should become familiar with the information labels affixed to the machine, as well as the warnings, cautions, and notes which appear throughout this guide. Read all the warning labels on the exterior and interior of the dispenser. If the labels become damaged or unreadable, you may purchase replacements from Fluid Management Customer Service.

Safety Notice Information
The two main notices used in this Guide and on the Accutinter 8000Elite are Warning and Caution. A Warning notice tells you about a hazard that could cause serious injury to you or extensive damage to the equipment. This information is featured in the beginning of the guide to emphasize safety.

When you see a Warning notice in this guide, read it carefully before continuing with the operation of the machine. Take all necessary precautions to avoid potential injury.

A Caution notice tells you about a danger that could cause injury to you or minor damage to the dispenser. When you see a Caution notice in this guide, read it carefully and be sure you understand it before continuing.

General Safety Information
DO NOT attempt to service a product yourself unless instructed to do so by Fluid Management Customer Service. Use only a Fluid Management Authorized Service Technician to repair your equipment. Please note that some parts can be upgraded or replaced by the customer. Fluid Management identifies those parts as such and provides documentation with instructions when it is appropriate for customers to replace those parts. You must closely follow all instructions when performing such replacements. ALWAYS make sure that the power is turned off and that the machine is unplugged before you attempt the replacement. If you have any questions or concerns, contact Fluid Management Customer Service.

Air Circulation
Your computer and monitor for your dispenser produce heat. The computer has a fan that pulls in fresh air and forces out hot air. The monitor lets hot air escape through vents. Blocking the air vents can cause overheating, which might result in a malfunction or damage. Place the computer and monitor so that nothing blocks the air vents. Allow 4 inches (101.6 mm) clearance around air vents.
Important Safety Information

Grounding

This product must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electrical shock by providing an escape for the electric current. This product is equipped with a cord that has a grounding wire and an appropriate grounding plug. The plug must be inserted into an outlet that is properly installed and grounded in accordance with all local codes and ordinances.

Cautions

• Check with a qualified electrician or service person if grounding instructions are not completely understood, or if in doubt as to whether product is properly grounded.
• DO NOT use an adapter or extension cord with this product.
• This unit must be plugged into a dedicated electrical line.
• To reduce risk of electric shock or injury, use indoors only.

Communications Regulation Information

Safety and regulatory compliance Information
See the affixed labeling on the machine. ETL Listed, conforms to UL STD 1450. Certified to CAN/CSA STD C22.2 NO. 68.

FCC Compliance Statement
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This product is for use on a dedicated nominal 120 Volt (US only) or nominal 220 volt circuit where applicable and has a grounding plug.

NOTE: Review the weight limits referenced in your computer documentation before placing monitor or other devices on top of your computer.

WARNINGs

• This machine draws 10 amps at 120 ± 10% VAC.
• This machine draws 5 amps at 220/230 ±10% VAC.
• DO NOT modify the provided plug.
• Improper use of grounding plug can result in risk of electric shock.
• Hazardous moving parts. Keep fingers and other body parts away.

Cautions

• Check with a qualified electrician or service person if grounding instructions are not completely understood, or if in doubt as to whether product is properly grounded.
• DO NOT modify the plug provided. If it will not fit into the outlet, have the proper outlet installed by a qualified electrician.

DANGER

Improper installation of the grounding plug can result in a risk of electric shock. If repair or replacement of the cord or plug is necessary, DO NOT connect the grounding wire to either flat blade terminal. The insulation wire with green or green and yellow stripes on the outer surface is the grounding wire. Check with a qualified electrician if the grounding instructions are not completely understood, or if in doubt about whether the product is properly grounded. DO NOT modify the plug provided. If it will not fit into the outlet, have the proper outlet installed by a qualified electrician.

Caring for Your Computer

Disconnect the power plug on the computer (by pulling the plug, not the cord) if any of the following conditions exists:
• You want to remove any parts.
• The power cord or plug becomes frayed or otherwise damaged.
• You spill something into the case.
• Your computer is exposed to rain, flooding, or any other excess moisture. Keep the flat panel monitor in room temperature conditions. Excessive cold or hot conditions can have an adverse effect on the liquid crystal display of the monitor.

NOTE: Review the weight limits referenced in your computer documentation before placing monitor or other devices on top of your computer.
Getting to Know Your Accutinter 8000Elite

**Technical Specifications**
- Height: 43” (109 cm)
- Width: 45” (114 cm)
- Depth: 43” (109 cm)
- Weight (Empty Canisters): 700 pounds (317 kg)

**Maximum power:**
- 120 volts +/- 10%, 60 Hz, 10 amp
- 220/230 volts +/- 10%, 50/60 Hz, 5 amp

**Environmental Conditions***
- Operating temperature: between 50°F (10°C) and 104°F (40°C)
- Relative humidity: between 5% and 85% without condensation

**Optional Accessories**
- Computer with 17” Flat Screen Monitor, Keyboard & Mouse
- Label Printer
- Barcode Scanner
- Surge Protector

*NOTE: Environmental conditions are strictly based on the types of colorants used (information provided by paint manufacturer). The specifications shown are for the machine only.*
Getting to Know Your Accutinter 8000Elite

Accutinter 8000Elite Features

- High speed dispense improves your order fulfilment efficiency
- DVX technology reduces frequency of calibration maintenance, parts and costs while providing amazing accuracy reliability, and repeatability with each dispense
- Precision tinting-order after order
- Compact footprint-small design with large capacity
- Robust conveyor front for queuing 5-gallon containers with drop down 1-gallon shelf and pull out quart/pint shelf.
- Automatic nozzle closer and sealed canister lids provide improved environment for waterborne colorants
- Automatic and manual agitation settings keep colorant viscosity ready for use
- LED locators including 5-gallon bung hole locator for improved container alignment
- Stainless steel surfaces for easy cleaning
- Swing out electronics door and casters allow for easier service and cleaning access

Tips to Improve Operation

- Clean nozzles daily for consistent and accurate dispense
- Purge each colorant once a day
- Follow the preventative maintenance schedule for your Accutinter 8000Elite
- DO NOT use solvents in your Accutinter 8000Elite
- Keep ColorPro software current
- DO NOT load screen savers onto your Accutinter 8000Elite computer/monitor. Adding this and other software may conflict with ColorPro and effect dispense operation
- Use the Welcome to ColorPro section of this manual for answers to questions about ColorPro
- Use the correct sized labels for your label printer (optional).
Getting Started
Installation

Your Accutinter 8000Elite has been designed for quick set up. If you have never used an Accutinter dispenser or are new to paint dispensers, read this section for instructions on getting started and installing your machine.

If you are an experienced user, you may already know enough to get started. Be sure to look over the information in the “Welcome to ColorPro” section of this guide to find out more about the new features and capabilities in ColorPro.
Getting Started
Installation

Unpacking and Set up
Follow the steps on the next four pages to set up your Accutinter 8000Elite.

1 Make sure these items are available before installing.
   Accutinter 8000Elite unit
   Computer, mouse, and keyboard
   Label printer and labels (optional)
   Barcode scanner (optional)
   Surge protector (not included)

2 Tools needed for installation.
   Phillips screwdriver
   Scissors or diagonal cutters

3 Unpack the machine.
   a. Remove the interior contents of the packaging.
   b. While unpacking the machine, inspect the machine for any damage that may have occurred during shipping.

   If any damage is found, notify the carrier immediately. Arrange for inspection in order to claim recovery. Claims for damage must be made by the consignee (YOU). The carrier assumes full responsibility upon acceptance of the shipment and will not entertain any claims by the consignor.

Verify the contents against the packing slip. Note if any items are missing or damaged. Call Fluid Management Customer Service at 1.800.462.2466 if any items are missing.

4 Position dispenser in permanent location.
   Choose a location for your dispenser that is capable of supporting the weight (1,000 pounds [454 kg]). Make sure there is enough room for service personnel to have access to the rear of the machine. If there is not enough room, routine maintenance may be difficult to perform.

5 Position the monitor, keyboard, and computer.
   Place the monitor and keyboard on the keyboard support on the top of the machine. See Figure 1.
6 **Plug in the power cord and connect all cables.**
   a. Route the keyboard, monitor, and mouse cables to the rear of the machine where the computer has been placed. Plug them into the appropriate ports on the back of the computer.
   b. If you purchased the optional barcode scanner, label printer or are using a spectrophotometer, route the cables to the rear of the machine where the computer has been placed. Plug these cables into the appropriate ports on the back of the computer.
   c. Connect the USB cable coming out of the hole of machine where the computer has been placed. Attach the USB cable to the port labeled “DISPENSER” on the back of the computer. See Figure 2
   d. Plug the power cords from the monitor, computer and Accutinter into the recommended surge protector.
   e. Plug the surge protector into a 15 amp dedicated electrical outlet.

7 **Turn on machine.**
   a. Locate the front panel below the nozzle closer in the center of the machine.
   b. Locate and unscrew the two Philips head machine screws provided.
   c. Open the front panel and locate on the red toggle switch near the bottom of the compartment.
   d. The red toggle switch needs to be in the ‘ON’ position on or ‘RESET’ position for the Accutinter to work properly.
   e. Close the front panel and screw in the two Philips head machine screws provided.

8 **Turn on computer and monitor.**
   Locate the on/off button on your computer and turn it on. Reference the computer’s user manual if you have difficulty locating.

9 **Locate the ColorPro icon on your desktop.**
   ColorPro and your manufacturer’s database were loaded at Fluid Management’s factory. If you cannot locate the ColorPro icon, Contact Fluid Management Customer Service. Open ColorPro by double clicking on the icon.

10 **After the machine is installed fill the canisters and update ColorPro**
   Complete an initial manual dispense for each colorant.
   (See “Getting Started: Preparing and refilling the canisters” on page 16).
The label printer software for the label printer is installed on the computer by Fluid Management. All you need to do is connect the printer cables to the computer and to a dedicated power outlet. The original packaging from the printer vendor includes the software, a quick start guide with detailed instructions, and the necessary cables.

Follow these steps to connect the printer:

1. Unpack the printer.
   - Make sure you have these items:
     - CD-ROM
     - Quick Start Guide
     - Roll of labels
     - USB cable
     - Label printer
     - Power cable
     - Power adapter
   - Plug the power cord into the power adapter.

2. Plug the power adapter into the power connector on the bottom of the printer.
   - Plug the other end of the power cord into a power outlet.
   - Plug the USB cable into the bottom of the printer.

3. The blue light on the front of the printer should be on if the printer is ready.
   - Click the Print Label (F5) button to print labels when dispensing a formula.

4. Plug the USB cable into the available USB port on the back of the computer.
The barcode scanner must be connected to the computer and keyboard. The barcode scanner is pre-programmed by Fluid Management. After the barcode scanner is connected, the scanner must be enabled to be compatible with ColorPro. The original packaging from the vendor includes the barcode scanner, the cable, and a quick start guide.

Follow these steps to install the barcode scanner:

1. Unpack the barcode scanner.
2. Make sure the barcode scanner and the cable are included.
3. Turn on the computer.

Connect the scanner cable to the keyboard cable from the Accutinter8000Elite.

**NOTE!** If the keyboard cable is a USB, add an adapter and connect the two cables.

Plug the interface cable modular cord into the port in the bottom of the scanner’s handle.

Connect the scanner cable to the purple keyboard connector on the back of the computer where the keyboard symbol is marked.
After the barcode scanner is connected to the computer and keyboard, it must be enabled in ColorPro. Follow these steps to enable the barcode scanner:

1. Locate **FM_Customizer** from Fluid Management folder and launch.
   - a. Type in “service” when you are prompted for the password.
   - b. Click Check.

2. Check the **Barcode Scanning Enabled** box on the **Barcoding and Extra Options** tab.
   - a. Check the **Barcode Base Verify Enabled** box.
   - b. Check **Print Override Base** box.
   - c. Check **Barcode Chip Scanning Enabled** box if you are using barcodes to identify formulas from other color chips.

3. Click **Apply Changes**, then click **Yes and OK**.

5. After enabling the barcode scanner, you can test the scanner by dispensing:
   - a. Open the **Dispense** menu.
   - b. Select a formula.
   - c. Click the **Dispense** button. If you receive a prompt that says, “Please Scan the Base Barcode”, you have successfully enabled the bar code scanner.
Getting Started
Preparing and refilling the canisters

After your machine is installed in the proper location, you need to fill the canisters with colorant so you can dispense for the first time. Your machine may be shipped with a small amount of glycol or colorant in the canisters already, but you need to fill them with to capacity with colorant. When re-filling canisters, you will follow the same process. Canisters come in varying capacities. Check the label inside the top cover for capacity and colorant locations. **DO NOT** overfill the canisters. After the canisters are filled, ColorPro (or your manufacture’s software) must be updated (See page 17).

1. Raise the top covers of the Accutinter so you can see the canisters inside.

2. Remove the caps from each canister one at a time and prepare to fill them with colorant.

**Cautions**
- **DO NOT** operate the dispenser until it is in a permanent location.
- **DO NOT** dispense if canisters are empty
- Before dispensing colorant for the first time, you must complete a manual dispense.
- **DO NOT** dispense without a container in place.
- **DO NOT** use shelf surface to seal open cans.
Getting Started
Preparing and refilling the canisters

3. Update ColorPro with the canister level information after you have filled all of the canisters.

4. From the Main Menu, select Maintenance (F3). In the Fill tab, select All (F2).

5. Select Fill To Top (F2) button.

6. When prompted, "...are you sure?", click Yes.

7. Select Done (Esc) to return to the Main Menu.

**NOTE:** When refilling, update the canisters by entering the amount of colorant you added in the text box. Press Enter. **NOTE:** Repeat entire process for each empty canister.
After you have filled the canisters and updated the software, you must do an initial dispense to make sure the Accutinter is working properly.

1. From any screen choose **Maintenance (F3 or F11)**.

2. Click on the **Purge** tab.

3. **Smart Purge**
   - Use “Smart Purge” for daily Purging.
   - This will only purge colorants that have not been recently used.

4. Purge colorants.
   - Click on the colorant to be purged or select **ALL** button to purge entire system. Click the **Purge (F3)** button.

5. Place a container underneath the nozzle **with nozzle closer open**.

6. Click **Dispense (F2)**. Colorant(s) will dispense. Prompt will appear confirming dispense.

7. Click **Done (Esc)**.
Getting Started
Using the shelves

For 1-gallon containers, lower the shelf and place the container underneath the nozzle. Use LED lights to align in center of container.

For 5-gallon containers, place them on the roller conveyor (or optional slide shelf) underneath the nozzle. Use LED lights to triangulate the container hole.

For quart and pint containers, pull out the shelf using the two pulls and place the container underneath nozzle. Use LED lights to align in center of container.
Basic Operations
Welcome to ColorPro4

ColorPro and ColorPro Professional puts usability at your fingertips with features that allow you to operate your Accutinter 8000Elite dispenser—instantly dispense any formula in your database, perform maintenance, run usage reports, estimate paint coverage for any room, adjust formulas, and calculate the formulas for lightening and darkening paint.

ColorPro4 Features:
- Dispense all your database formulations or manually create your own colors
- Store customer information and color requirements so you can provide consistent service time and time again
- Integrates with spectrophotometer hardware and software
- Customize settings to meet your business volume needs.
- Easy to use screens will assist you in routine maintenance
- Run diagnostics on the machine for quick troubleshooting
- Track and report colorant, machine, and formula usage to assist you in inventory, maintenance and trend management
- All functions can be conducted with mouse or keyboard
- ColorPro translated into a variety of operator languages
The main screen of ColorPro features five selections.

**Dispense**
Click here to go to the Formula Book, Manual Dispense, and Dispense Queue menus.

**Maintenance**
Click here to add colorant, purge lines, agitate colorants.

**Reports**
Click here to run reports for a selected date range in csv.file format.

**Help Menu**
Click here for training videos to get answers to your ColorPro and Accutinter questions.

**About**
Click here to see ColorPro and Accutinter information.
Basic Operations
Dispensing from Formula Book

From the Main Menu, choose Dispense (F2) button. The Formula Book tab allows you to select, dispense, and adjust the formula. You can also estimate paint quantities and enter new formulas.

Clear Formula
To select a new formula or to start over, choose Clear Formula (F9).

Formula Information
Select the Brand of formula you are searching for by using the drop down menus.

Enter the Formula Name or use the drop down menus to search for the Formula Number in your database.

Select the desired Product, Finish, and Container Size using the drop down menus.

Dispense
Choose Dispense (F2) to dispense the formula now. When dispensing, place container under nozzle. Prompt will appear confirming dispense.

To dispense another container of the same formula, choose Dispense (F2).
Basic Operations
Dispensing from Formula Book

Ingredients
The colorant ingredients needed to dispense your formula will show here.

Print Label
Click here to print labels.

Order Queue
This number indicates the number of jobs queuing.

Adjust
Click here (F6) to adjust individual formulas (See page 28).

Save As Custom
Click here (F7) to save as a custom color or customer information.

Send To Queue
Choose Send to Queue (F10) to dispense the formula later.

Price
Click here (F3) to estimate the cost of a job or price for a specific formula (optional).

Coverage Estimator
Click Coverage Estimator (F8) to estimate how much paint is needed for a job.
Basic Operations
Manual dispensing

From the **Main Menu**, choose **Dispense (F2)** button. The **Manual Dispense** tab allows you to select, dispense, and adjust the formula. You can also estimate paint quantities, and enter new formulas.

- **Enter Amounts**
  The colorants will be displayed under Selected Ingredients. Type in the shot size of the colorant that you require. Repeat the steps for each colorant in that formula.

- **Brand**
  Select the Brand of paint you are creating a formula for by using the drop down menu.

- **Ingredients**
  From the ingredient list, select the first colorant by double clicking on the button.

- **Get Base**
  After selecting brand and colorants, click here to select Base and size to dispense new formula info.

- **Dispense Now**
  Dispense now by selecting **Dispense (F2)**.

  Or

- **Send to Queue**
  Choose to dispense the formula later by selecting **Send to Queue (F10)**.
Basic Operations
Using external data source and dispense queuing

From the Main Menu, choose Dispense (F2). The Dispense Queue tab allows you to enter and dispense a formula scanned by a spectrophotometer (optional) or from a previous order not yet dispensed.

Order Queue
This number indicates the number of jobs queuing.

Input List
The Input List (F4) displays all the formulas waiting to be dispensed from an external source or previously requested. The number of jobs queuing is located in top right corner.

Search for a job by clicking on any of the input tabs.

Remove Job
Click here to remove the highlighted dispense from the input list.

Dispense
Choose Dispense (F2) after selecting the formula from the Input List.
Basic Operations

Adjusting formulas

Color formulas can be modified to adjust lightness, darkness, and modify existing formulas. From any tab in the Dispense Menu, click **Adjust (F6)** after a formula is selected.

**Adjust Ingredients**
On the Adjust Ingredients tab, the original formula colorant amounts are displayed.

**Selected Ingredients**
In the Change +/- fields, type the amount to add or subtract from the original formula for each colorant. The totals will change based upon amounts you enter.

**Dispense Total**
Click Dispense Total (F3) to dispense the original formula plus adjusted amounts.

**Dispense Change**
Click Dispense Change (F2) to dispense the incremental added colorant amounts.
On the **Adjust Scaling** tab, the original formula colorant amounts are displayed.

Create a deeper or lighter formula by selecting **Percent Change** and selecting a value from drop down box, or select **Container Size** and select a different paint container size from drop down box.

**Reset**
Click here (F9) to return to original formula settings.

**Dispense Total**
Click **Dispense Total** (F3) to dispense the original formula plus adjusted amounts.

**Dispense Change**
Click **Dispense Change** (F2) to dispense the incremental added colorant amounts.
Basic Operations
Purging the lines

It is recommended that you complete a purge daily to ensure optimal Accutinter performance and avoid possible mis-tints.

1. From any screen choose **Maintenance (F3 or F11)**.

2. Click on the **Purge** tab.

3. Purge colorants. Click on the colorant to be purged or select **All** button to purge entire system. Click the **Purge (F3)** button.

4. Place a container underneath the nozzle **with nozzle closer open**.

5. Click **Dispense (F2)**. Colorant(s) will dispense. Prompt will appear confirming dispense.

6. Click **Done (Esc)**.

**Smart Purge**
Use “Smart Purge” for daily Purging. This will only purge colorants that have not been recently used.
Basic Operations  
Stirring the colorants

When adding new colorants or if the colorant has not been used for several days, you may want to manually stir colors. From any screen, choose Maintenance (F3 or F11). The Agitate tab allows you to stir colorants in the canister.

1. Click on Agitate tab. In the Duration in Minutes (F4) field, type in the amount of time colorants should stir.

2. Click Agitate (F2) to begin agitation cycle. Progress bar will appear confirming agitation cycle. Click Done (Esc).

**NOTE:** The default cycle is 30 seconds per hour. Fluid Management recommends 4 minutes for manual agitation.
For additional information on how to operate your Accutinter or ColorPro, click Help (F1). The main screen of ColorPro features six selections.

**Accutinter Models**
Contains information regarding shelves, container sizes, and dispensing.

**ColorPro**
Find information about dispensing with ColorPro, maintaining the machine, and customization.

**Quick Start Guide**
Overviews regarding dispensing, maintaining, and customizing your Accutinter.

**Maintenance**
Includes information about canister, nozzle, and preventative maintenance, and line purging.

**Troubleshooting**
Contains information regarding dispensing, color tinting and other operational issues.

**Safety**
Important safety instructions to note when operating equipment.
Maintenance, Care and Use

Your Accutinter 8000Elite depends on clean and well maintained parts. To ensure dispensing accuracy and increase the operation of your Accutinter 8000Elite, follow the maintenance schedule detailed below:

**PERFORM EVERY DAY:**
- Clean each of the nozzles with the recommended nozzle cleaning tool and purge (see below).
- Remove all excess colorant and debris from the nozzle and nozzle area.
- Clean all accessible surfaces and cabinet with a mild cleaning solution.
- Empty and clean the drip tray. Replace if necessary.
- Moist sponge daily to keep colorant from drying.

**PERFORM EVERY WEEK:**
- Clean the spill trays around canisters.

**PERFORM EVERY SIX MONTHS:**
- Check the calibration and re-calibrate as required.*

*This should be performed by a Fluid Management authorized service technician.

Your Accutinter 8000Elite will perform best if the nozzle and colorant lines are purged and cleaned every day. If you use your machine frequently, Fluid Management recommends cleaning and purging the nozzle at least once a day. The instructions for daily nozzle cleaning are below. For filling the colorant canisters, go to page 17.

1. **Open nozzle closer**
   - Click Maintenance (F11)
   - Choose Purge tab
   - Click Open/Close (F7)

2. **Remove cup holder from nozzle closer**
   - Slide black cup holder left
   - Remove cup from bracket and place to the side

3. **Clean nozzle**
   - Clean each opening with included nozzle cleaning pick
   - Use a circular motion to make sure opening is clear

4. **Clean cup**
   - Remove sponge insert
   - Clean inside of cup liner with water and paper towel

5. **Replace sponge**
   - Replace sponge insert
   - Moisten sponge with water
   - Replace cup holder to closer bracket

6. **Replace cup holder to nozzle closer**

7. **Purge Colorants**
   - Click Maintenance (F11)
   - Choose Purge tab
   - Click All
   - Click Purge (F3)
   - Click Dispense (F2)

8. **Close Nozzle closer**
   - Click Maintenance (F11)
   - Choose Purge tab
   - Click Open/Close
Most of the problems listed in this section can be prevented by daily cleaning and by purging the nozzle. See the Maintenance, Care and Use section in this manual for instructions.

Use the chart below to locate the problem and perform the recommended actions in the last column.

Contact Fluid Management Customer Service if you are unable to find a resolution.

| The nozzle closer is not opening or closing. | ...Is the nozzle closer covered with dried colorant and debris? | - Clean all dried colorant and debris from the nozzle closer area. Make sure the nozzle arm is clean so it moves freely.  
- If the nozzle closer still does not close, call **Customer Service**. |
| Colorant drips or runs after dispensing. | ...Is ColorPro prompting you to fill the canister?  
...Do the nozzle openings need to be cleaned?  
...Does the colorant have air in it? | 1- If yes, fill the canister with colorant (see page 16).  
2- Agitate for up to three minutes.  
3- Purge the line.  
- If the canister is full, clean the nozzle and complete a purge using ColorPro (see page 28). Repeat if necessary.  
- Complete a purge using ColorPro (see page 28). Repeat if necessary. |
| A colorant canister needs to be filled. | Follow the "Preparing and refilling canisters" instructions on page 16. |
| The canister cover and lids need to be cleaned. | Soak the canister covers in hot water and mild detergent. Wipe off the excess debris and dried colorant when the colorant has loosened.  
Scrape the excess colorant off with a putty knife. |
| The colorant coming out of the nozzle is drippy or clumpy. | ...Do the nozzle openings need to be cleaned? | Clean the nozzle openings and purge the lines (see page 31). The colorant should come out of the nozzle in a steady stream. |

FMDirect

Fluid Management products are backed by FMDirect, our nationwide team of phone and field service engineers. Providing you with local, hands-on support, over 30 factory-direct service technicians deliver expertise when and where you need it.
• 24/7 multilingual tech support
• Professional installation and on-site operator training
• Fully-stocked parts inventory on FMDirect vans
• Extended warranty and preventive maintenance programs

Upgrades and Replacement Parts

Some parts can be upgraded or replaced by the customer. Fluid Management expressly identifies parts as such, and provides documentation with instructions when it is appropriate for customers to replace those parts. You must closely follow all instructions when performing such replacements. ALWAYS make sure that the power is turned off and that the product is unplugged from any power source before you attempt the replacement.

DO NOT attempt to service a product yourself unless instructed to do so by a Customer Service Representative. Use only a service provider who is approved to repair your particular product.

Obtain Warranty Service

First, follow the advice in this guide. If the unit still does not function, call Customer Service for information about how to obtain warranty service.

The serial plate is located underneath the lid of the machine. It includes the serial and model numbers for your machine. Please make a note of these numbers below:

Date of purchase: ________________________
Model Number: ________________________
Serial Number: ________________________
Your Service Technician’s Name: ________________________
WARRANTY COVERAGE

Fluid Management, Inc. (“Fluid Management”) warrants the Accutiner 8000Elite Fluid Management Accutinters (“Paint Equipment”) to be free of defects in material and workmanship during normal operation, use and service for a period of two years from the date of shipment by Fluid Management.

If any Paint Equipment fails during normal operation, use and service during the warranty period due to a defect in material or workmanship, Fluid Management will repair the defective Paint Equipment and replace any defective parts at no charge to the Customer. The warranty repairs and defective parts replacement will be carried out by Fluid Management or one of its Authorized Service Representatives.

The above warranty and obligations are subject to the WARRANTY CONDITIONS, EXCLUSIONS AND LIMITATIONS and the WARRANTY DISCLAIMERS AND LIABILITY LIMITATIONS set forth below.

WARRANTY CLAIMS

Warranty claims must be asserted during the warranty period. While Paint Equipment is under warranty, no repair or part replacement should be undertaken without first contacting Fluid Management at 800-462-2466. To expedite the process, the model and serial numbers of the Paint Equipment should be available at the time of the call.

WARRANTY CONDITIONS, EXCLUSIONS AND LIMITATIONS

Fluid Management shall have no liability or obligation under its warranty in connection with any warranty claim asserted or any failure or malfunction occurring after the expiration of the warranty period.

As a condition to any warranty repair or part replacement, Fluid Management shall have the right to first inspect, test and evaluate the Paint Equipment and parts that are claimed to be defective.

Return of Paint Equipment and parts to Fluid Management requires a Return Goods Authorization (RGA) from Fluid Management, and the RGA number must be included with any returned Paint Equipment or part.

Customer shall be required to provide Fluid Management and its Authorized Service Representatives with all information that any of them may request concerning the maintenance, operation, use, service, failure or malfunction of Paint Equipment and parts that are claimed to be defective.

Fluid Management may use reconditioned parts for warranty repairs and parts replacement.

Warranty repairs and part replacement do not extend the warranty period for Paint Equipment and repaired Paint Equipment and replacement parts are warranted only for the remainder of the original warranty period.

Any repair or replacement requested as a warranty repair or replacement that is not covered by Fluid Management’s warranty will be billed to Customer as non-warranty repair or replacement on a time and materials basis.
WARRANTY CONDITIONS, EXCLUSIONS AND LIMITATIONS (CONT.)

Fluid Management’s warranty transfers to the new owner with transfer of ownership Paint Equipment. It is the responsibility of new owner to notify Fluid Management at 1-800-462-2466 of the transfer of ownership of Paint Equipment. Transfer of ownership does not extend the warranty period.

Fluid Management’s warranty does not cover, extend or apply to, or include:

• Computer or computer-related equipment such as laptops, monitors and printers and other third-party equipment supplied with Paint Equipment (in the case of computer and computer-related equipment such as laptops, monitors or printer, and other third-party equipment, any warranty is limited to a pass through to Customer of any warranty received from the equipment manufacturer, and is subject to whatever terms, conditions and limitations are imposed by the equipment manufacturer)

• Third–party software (in the case of third-party software, any warranty is limited to a pass through to Customer of any warranty received from the software provider and is subject to whatever terms, conditions and limitations are imposed by the software provider)

• Normal wear and tear

• Any Paint Equipment or part that fails or malfunctions due to any computer or computer-related equipment, other peripheral equipment, third-party software or software or equipment provided by Customer or a third party

• Any Paint Equipment or part failure or malfunction that Fluid Management or one of its authorized service representatives determines to have been caused by or attributable to damage during or after shipment, colorant in the wrong canister, colorant related issues (e.g. Beads in colorant, etc.), overfilling of canisters, improper operation or misuse, lack of daily maintenance, power surge, power outage, fire, flood, water leakage, accident, acts of god, casualty, or other similar causes

• Any Paint Equipment or part that Fluid Management or one of its Authorized Service Representatives determines was tampered with, disassembled, repaired, modified or altered by anyone other than Fluid Management or one of its Authorized Service Representatives without the prior written authorization of Fluid Management, used to mix or dispense material that the Paint Equipment was not designed to mix or dispense or otherwise used for a purpose or under conditions that differ from those for which the Paint Equipment was designed, or subjected to abnormal use or service, or has had its serial number removed or altered.

• Field repair, removal, reinstallation or other similar tasks not performed by Fluid Management or one of its Authorized Service Representatives

• Cabinets and structural frames

• Mis-tints or misfills
WARRANTY DISCLAIMERS AND LIABILITY LIMITATIONS

THE ABOVE WARRANTY IS THE SOLE AND EXCLUSIVE WARRANTY MADE BY FLUID MANAGEMENT WITH RESPECT TO EQUIPMENT, COMPONENTS OR PARTS AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH OTHER WARRANTIES ARE EXPRESSLY EXCLUDED.

THE OBLIGATIONS, RIGHTS AND REMEDIES SET FORTH ABOVE ARE THE SOLE AND EXCLUSIVE OBLIGATIONS OF AND SOLE AND EXCLUSIVE RIGHTS AND REMEDIES AGAINST FLUID MANAGEMENT WITH RESPECT TO ANY ALLEGED DEFECT OR DEFICIENCY IN ANY EQUIPMENT, COMPONENTS OR PARTS.

UNDER NO CIRCUMSTANCES SHALL FLUID MANAGEMENT OR ANY OF ITS AUTHORIZED SERVICE REPRESENTATIVES HAVE (I) ANY LIABILITY FOR ANY CLAIM, LOSS, DAMAGE, INJURY, LIABILITY, OBLIGATION, COST OR EXPENSE THAT DIRECTLY OR INDIRECTLY RELATES TO OR ARISES OUT OF THE PERFORMANCE OF ANY SERVICES OR THE USE, FAILURE OR MALFUNCTION OF ANY EQUIPMENT, COMPONENT OR PART OR (II) ANY LIABILITY FOR INDIRECT, SPECIAL, PUNITIVE OR CONSEQUENTIAL DAMAGES, INCLUDING, BUT NOT LIMITED TO, LOSS OF SALES, LOSS OF PROFITS, LOSS OF MATERIAL BEING DISPENSED, DOWN TIME, LOSS OF PRODUCTION, LOSS OF CONTRACTS, OR DAMAGE TO REPUTATION OR GOOD WILL, WHETHER OR NOT FLUID MANAGEMENT OR ANY OF ITS AUTHORIZED SERVICE REPRESENTATIVES WAS AWARE OF OR ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

IN ANY EVENT, FLUID MANAGEMENT’S TOTAL LIABILITY IN CONNECTION WITH ANY INDIVIDUAL ITEM OF EQUIPMENT SHALL LIMITED TO THE NET PRICE PAID TO FLUID MANAGEMENT FOR SUCH ITEM OF EQUIPMENT.
